

AI ENABLEMENT & TRANSFORMATION

Put AI where the *hours* go.

Find the AI opportunities worth the investment, redesign how the work gets done, and put AI into the systems your team already uses, with a person approving what matters and results measured against a baseline.

WHEN TO CALL US

Licences are bought, but nobody can show a baseline or a saving.

→ We set baselines first and track benefits against agreed KPIs.

The team copies data between documents, inboxes and systems all day.

→ Agents read, extract and file it; a person approves the result.

Pilots work in a demo and stall before production.

→ We build against your real data, behind controls you can switch off.

Legal, security or clients are asking what the AI can see.

→ Access boundaries, review steps and audit logs are part of the design.

HOW WE WORK

01 Find	Opportunity register
02 Value	Ranked roadmap
03 Redesign	Workflow and control design
04 Prove	Pilot results
05 Scale	Value dashboard

WHAT THE WORK COVERS

Assess

- ◆ AI readiness review
- ◆ Workflow diagnostics and process mapping
- ◆ Data and access review
- ◆ Use cases ranked by value and effort
- ◆ Risk identification

Control

- ◆ Approval steps and access boundaries
- ◆ Accuracy and safety testing
- ◆ Usage and cost monitoring
- ◆ Audit logs
- ◆ Team enablement and handover

Build

- ◆ Human-reviewed AI agents
- ◆ AI features inside existing apps and portals
- ◆ Assistants grounded on your documents
- ◆ Document reading and data extraction
- ◆ Integrations with CRM, ERP, email and chat

Measure

- ◆ Baselines before build
- ◆ Adoption metrics
- ◆ Quality gates
- ◆ Benefit tracking against agreed KPIs

Model-agnostic

We choose models per task on accuracy, cost and where your data is allowed to go, and can change them later. Naming a model provider does not imply a partnership.
