

FORWARD DEPLOYED ENGINEERS

Engineers who sit where the *work* is.

An engineer from our team joins yours: in your channels, your standups and your systems. They learn the problem from the people who have it, build against your real data and put working software in front of users within days, not after a specification phase.

PACKAGES

Field Sprint from \$1,849

ENGAGEMENTS

Two weeks to ongoing

DELIVERED BY

Auvorent, in-house

WHEN TO CALL US

Every vendor asks for requirements your team has no time to write.

→ An engineer learns the work by watching it, and writes the spec as working software.

The AI pilot works in a demo, and nobody on the floor uses it.

→ Built with its users, inside their tools, and changed every week from their feedback.

The data lives in five systems and nobody owns the joins.

→ We connect the systems one decision needs, then the next decision's.

Your engineers are on the roadmap, so operations keeps waiting.

→ A separate engineer for operational problems, without pulling your team off the product.

HOW WE WORK

01	Embed	Access and a problem statement
02	Learn	First-ship plan
03	Ship	Working software in use
04	Harden	Production release
05	Hand over	Runbook and backlog

WHAT THE WORK COVERS

Embed

- ◆ Joins your channels, standups and tools
- ◆ Works beside the people who have the problem
- ◆ Maps the workflow, data and systems
- ◆ Agrees what working means

Ship

- ◆ Live with real users within days
- ◆ Weekly changes from user feedback
- ◆ Monitoring and access controls
- ◆ Code in your repositories

Build

- ◆ Internal tools and dashboards
- ◆ AI assistants and agents
- ◆ Integrations and data pipelines
- ◆ Automations with human approval

Hand over

- ◆ Runbook and documentation
- ◆ Training for your team
- ◆ A backlog of what to build next
- ◆ Optional ongoing support

Embedded, remote by default

Engineers work inside your tools and channels, with working hours that overlap yours. On-site weeks can be added where the work needs them, with travel billed at cost.

PRICING

\$30 per hour · for work outside a package

ONE ENGINEER, ONE PROBLEM

Field Sprint
\$1,849

2 weeks · Fixed price

 SIX-WEEK DEPLOYMENT **RECOMMENDED**

Field Deployment
\$11,499

6 weeks · Fixed price, scope set in the Field Sprint

ONGOING EMBEDDED TEAM

Forward Pod
\$10,800 / month

Monthly

A forward deployed engineer is billed at \$30 an hour like every Auvorent role: \$1,200 a week, or \$4,800 a month full time. Work outside a package is billed by the hour.
