

INTELLIGENT BUSINESS OPERATIONS

Margin is made in the *operation*.

For service companies and internal delivery functions, performance depends on repeatable execution. We find where effort leaks out of delivery and put the controls in that stop it.

PACKAGES

Diagnostic from \$1,499

BUILT FOR

Service and delivery businesses

DELIVERED BY

Auvorent, in-house

WHEN TO CALL US

Nobody can say which projects or clients actually make money.

→ Cost visibility by project, client and role, reviewed monthly.

Project managers spend days building status reports.

→ Automated PMO reporting from the systems the work already lives in.

Rework and late escalations eat the schedule.

→ Quality gates and escalation paths defined before work starts.

Some people are overloaded while others wait for work.

→ Utilization analysis and capacity allocation across teams.

HOW WE WORK

01 Measure	Operations baseline
02 Design	Target operating model
03 Control	Governance pack and dashboards
04 Embed	Runbooks and trained owners
05 Improve	Monthly review

WHAT THE WORK COVERS

Operating model
