

MANAGED TEAMS & STAFF AUGMENTATION

Capacity that answers for *delivery*.

Dedicated people across engineering, design, QA, DevOps, AI and delivery management, structured around your product, with reporting, escalation and quality standards agreed in the contract.

WHEN TO CALL US

Hiring takes months and the roadmap won't wait.

→ A dedicated team structured around your product and stack.

You need a skill for six months, not a permanent hire.

→ Flexible capacity you can scale up or down as the work changes.

Past contractors delivered hours, not outcomes.

→ Defined deliverables, reporting cadence and a responsibility matrix.

Your leads spend their time managing contractors.

→ A delivery manager who owns coordination, quality and escalation.
