

PRODUCT RESCUE & RECOVERY

Your product is stuck. Your business *shouldn't* be.

You have paid for software that still isn't live. Before you spend another dollar, we establish what has really been built, what can be saved and what launch will take, then take accountability for getting you there.

ASSESSMENT \$1,749, fixed	RECOVERY Milestone-billed, around 60 days where feasible	DELIVERED BY Auvorent, in-house
--	---	--

WHEN TO CALL US

Every update promises launch next month, and it has for a year.

→ An independent view of what works today, separate from what is reported.

More budget is requested, but the product isn't visibly closer.

→ Remaining work costed from the code, not from the vendor's estimate.

Demos look finished; real use falls apart.

→ A reproducible build and end-to-end tests before anything else is promised.

You're not sure you could move the code if you had to.

→ Ownership, access and handover risks mapped before you decide anything.

HOW WE WORK

01	Assess	Recovery report
02	Decide	Recommendation
03	Hand over	Verified, reproducible build
04	Recover	Milestone releases
05	Launch	A live product you control

WHAT THE WORK COVERS

Assess

- ◆ Codebase and architecture review
- ◆ Build and deployment check
- ◆ Defects and security concerns
- ◆ Ownership and access review

Recover

- ◆ Authorised vendor handover
- ◆ Stabilisation
- ◆ Feature completion
- ◆ QA and release readiness

Decide

- ◆ Recover, repair, rebuild or restart
- ◆ Launch-critical scope
- ◆ Costed options and timelines
- ◆ Risks and dependencies

Sustain

- ◆ Defect warranty
- ◆ Monitoring and patching
- ◆ Ongoing enhancements
- ◆ Documentation and handover

Assessment before promises

We don't quote a fixed price or a launch date for code we haven't seen. You don't need to leave your current developer to request an assessment, and if the evidence says stay, we'll say so.

PRICING

\$30 per hour · for work outside a package

INDEPENDENT ASSESSMENT

Recovery Assessment

\$1,749

5-10 business days · Fixed price · half credited if you proceed

 TAKEOVER TO LAUNCH **RECOMMENDED**

Recovery Launch

\$17,499+

Around 60 days, where the assessment supports it · Fixed after the assessment, billed by milestone

ONGOING CARE

Product Continuity

\$1,350 / month

Monthly

Recovery work is estimated from the assessment at \$30 an hour, like every Auvorent service, then fixed by milestone so you know the price before work starts.

Start a conversation

What the product is, how long it has been in development, roughly what has been spent, and whether you can access the code.
